The extensive World of Jackpots product library provides super-store quantities of linked progressive-centric brands, initially launching with the themes; Players Paradise™, Lights Camera Action™, Rio Grande Rapids™, Jackpot Zone™, and Rapid Strike™. And this is just the beginning! Each jackpot brand includes multiple unique game titles

**Don't replace - REPAIR IN-HOUSE AND SAVE!**

## Buying Replacement Units!

Is your casino totally self-sufficient in repairing monitors, power supplies, bill validators and ticket printers or are you throwing away hundreds or thousands of dollars purchasing replacement units? While it is not exactly a "hidden" cost to your department, some slot managers simply accept the price of replacements as the "cost of doing business" while it progressively nibbles away at the casino's bottom line. IT DOESN'T HAVE TO BE THIS WAY.

### My Two Week Slot Tech School Brings the Training to Your Casino

In truth, most electronic repairs are pretty easy. Often, it's just a matter of testing and replacing a small handful of inexpensive, off-the-shelf electronic components. Sometimes, it's just one. For example, it costs less than 25 cents in parts to repair the most common failure in Bally power supplies. The entire process takes about five minutes.

**LET ME SHOW YOUR SLOT TECHS THE QUICK AND EASY WAYS TO REPAIR CASINO ELECTRONICS**  
You will see an immediate savings to the casino, starting with the in-house repairs that will be performed during the class!

## HERDS OF WINS™

Herds of Wins™ by Konami Gaming, Inc. is a new Xtra Reward® series title featuring a novel reel animation concept with stampeding 3D game symbols. This original math, KP3® video slot is based on the familiar Multiple Lines 3-3-3-3-3® layout, but takes an entirely different spin when players enter the bonus feature.

Whenever the game's golden-framed Action Stacked Symbols® appear on all

positions of 2 or more reels, the Herds of Wins feature is initiated and all remaining partially-framed reels are nudged until all positions are framed and replaced with the same symbol. After which, all framed reels slide to fill the left most reels and entire reel structure lays back in a 3D motion as the remaining right reel symbols begin charging toward the player in a unique animation sequence akin to a racing herd of animals. The symbols eventually slow and resulting formations are brought back to a 3-3-3-3-3 layout for traditional line awards.

Herds of Wins is available across Konami's video cabinet lineup, including its classic Podium®, SeleXion™ multi-game and extra-large Podium Goliath®.
